USDA STAFF AND NOT NECESSARILY STATEMENTS OF OFFICIAL U.S. GOVERNMENT  
POLICY

Required Report - public distribution

**Date:** 5/19/2016

**GAIN Report Number:** SP1609

## Spain

### Food and Agricultural Import Regulations and Standards - Certification

### FAIRS Export Certificate Report

**Approved By:**

Rachel Bickford  
Agricultural Attaché

**Prepared By:**

Marta Guerrero  
Agricultural Specialist

**Report Highlights:**

This report only focuses on Spanish specific certification requirements when they differ or are additional to EU-harmonized certification. This report should be read in conjunction with the [EU-28 FAIRS Export Certificate report](#) prepared by the FAS Office in the U.S. Mission to the European Commission (USEU).

**Disclaimer:** This report was prepared by the Office of Agricultural Affairs of the USDA/Foreign Agricultural Service in Madrid, Spain for U.S. exporters of domestic food and agricultural products.

While every possible care was taken in the preparation of this report, information provided may not be completely accurate either because policies have changed since its preparation, or because clear and consistent information about these policies was not available. It is highly recommended that U.S. exporters verify the full set of import requirements with their foreign customers, who are normally best equipped to confirm requirements with local authorities, before any goods are shipped.

**FINAL IMPORT APPROVAL OF ANY PRODUCT IS SUBJECT TO THE IMPORTING COUNTRY RULES AND REGULATIONS AS INTERPRETED BY BORDER OFFICIALS AT THE TIME OF PRODUCT ENTRY.**

**Table of Contents**

**General information ..... 2**

**Section I. List of All Export Certificates Required By Spain (Matrix): ..... 3**

**Section II. Purpose of Specific Export Certificate(s) ..... 4**

**Section IV. Government Certificate’s Legal Entry Requirements ..... 7**

**Section V. Other Certification/Accreditation Requirements ..... 7**

**Appendix I. Electronic Copy or Outline of Each Export Certificate ..... 7**

**Appendix II. Other Key Contacts ..... 8**

**General information**

As an EU member since 1986, Spain applies EU harmonized regulations on export certificates for plant or animal products whether or not they are intended for human consumption. However, in the absence of an EU-harmonized certificate, Spain may **require certain specific health certificates and occasionally the lack of specific details in the governing regulation also provides significant leeway for border inspectors to interpret.**

Competent authorities on certificates vary depending on the type of products. While the Ministry of Health, Social Welfare and Gender Equality (MSSSI) is responsible for all products intended for human consumption, the Ministry of Agriculture, Food and Environment (MAGRAMA) is responsible for agricultural products for purposes other than human consumption.

There are a number of Border Inspections Points (BIP) in Spain that carry out [plant health inspection](#) (MAGRAMA) and veterinary inspection for products [intended](#) for human consumption

(MSSSI). Contact details of the EU BIPs, listed by countries, are available on the following links: [Approved BIP](#) and [BIP contact information](#).

**Section I. List of All Export Certificates Required By Spain (Matrix):**

The imports of live animals and product of animal origin, for purposes other than food (including live animals, semen, ovules and embryos) are subject to specific Spanish certification requirements.

There is also a specific declaration for used kitchen oil intended for use in biodiesel production. All models of Import Certificates that are not harmonized at the EU level can be found in the [Ministry's website](#). Forms can be obtained also in the following links (certificates are bilingual):

Source: MAGRAMA (Ministry of Agriculture, Food and Environment)

The above listed Veterinary Certificates, requested by the MAGRAMA (Ministry of Agriculture, Food and Environment), require the signature of an Official Veterinarian.

<sup>1</sup> It is a declaration by the importer, not a certificate. Hence, no USDA signature is required.

<sup>2</sup> An explanatory note is available in Spanish language in the [link](#).

## **Section II. Purpose of Specific Export Certificate(s)**

With the exception of specific requirements identified in this report, imports of food and agricultural products into Spain are not subject to special certification other than that of the European Union. European Union legislation calls for many health and supervisory requirements that are meant to guarantee that imports meet the standards of production in Member States.

Spain, as an EU Member State, follows all rules and regulations that govern food legislation, including certification, within the European Union. While certification requirements are developed at the EU level, Spanish authorities are responsible for the enforcement of the regulations. Nevertheless, it is important to note that when EU-wide legislation is incomplete, not harmonized or absent, Spain might require certain specific health certificates as identified in the **Section I** Table.

Certification requirements are developed at the EU level. However, Member State inspection services are responsible for enforcement. Spain is among the most vigilant of EU Member States with respect to enforcement of the import requirements. While purely administrative mistakes such as minor typographic mistakes can sometimes be rectified, a zero tolerance policy can be assumed for those mistakes that affect the identity and traceability of the shipment (e.g. wrong establishment number). According to General Principles for Certification, the certificate must be issued before the consignment to which it relates leaves the control of the competent authority of the country of dispatch. As a consequence, Spain's Authorities have no tolerance for health certificates issued after the day of shipping.

For additional information on EU-Harmonized Certification Requirements, please consult the [EU-28 FAIRS Export Certificate Report](#). Under this report, you may find information on the U.S. competent authority that is authorized to issue the food and agricultural import certificates required by the EU. This report can also be accessed through the [FAS website](#). An overview of legally required certificates in the EU and references to the U.S. authority issuing these certificates is available at in the [USEU website](#).

For more information on food standards and regulations, please consult the [Food and Agricultural Import Regulations and Standard Report for the EU-28](#).

### **Special Import Permits**

- **Samples without Commercial value to Spain**

For sanitary reasons, food products imported into the EU, even if they are not intended for commercial sale, must meet certain requirements on food hygiene and animal health.

On September 2011 Spain's Ministry of Health, Social Services and Gender Equality (MSSSI) implemented a procedure to authorize the import of samples of food products for human consumption without commercial value.

To guarantee the access of samples without commercial value, prior or at the arrival of the product, the Common Entry Document ([CED](#)) has to be presented and filled in specifying "Other" in the "For internal market" field. The same rules to commercial shipments apply to samples without commercial value regarding the Common Entry Document (CED published as [Annex II to Regulation 669/2009](#) ).

Other required documents include a copy of the invoice, documentation proving the non-commercial destination of the product (trade show information or research institute to which the samples are shipped), and the original [Declaration of Destination](#).

Further details about requirements to import samples and to send parcels with food items to Spain can be found at the following [link](#) (Information only available in Spanish language).

- **Imports of biological material**

The import of biological material has to be approved by the Ministry of Agriculture, Food and Environment (MAGRAMA) or the Ministry of Health depending on the nature of the potential risk. In those cases where the biological material could potentially pose a threat in human health, the MOH will be responsible for the import approval. In those cases where the potential risk would affect to animal health, the Ministry of Agriculture (MAGRAMA) will oversee the import.

In those imports under MAGRAMA's rule, only an import permit is required. On February 2012 the MAGRAMA reviewed the procedure to authorize the import of biological material of animal origin for research purposes. More detailed information can be found in the [link](#) (Information only available in Spanish language) as well as the pertaining [form](#) to request the import permit to the competent authority (Sub directorate General for Sanitary Agreements and Border Control).

The request must be prior to the arrival of the goods to the Border Inspection Post (BIP). Otherwise, they may be retained until the end of the process. The importing researcher must complete the import of biological material for research form and present it to the competent authority.

According to Royal Decree 65/2006, those non-commercial biological material imports under MOH rule, an import authorization is required. The importer/exporters may request the authorization to the following email address [mbiologicas@msssi.es](mailto:mbiologicas@msssi.es). More detailed information can be found in the [link](#)

(Information only available in Spanish language) as well as the pertaining forms necessary to request the import authorization to the competent authorities (Dirección General de Salud Pública, Calidad e Innovación).

- **Imports of planting seeds to Spain**

To import planting seeds to Spain a request has to be submitted by the local importer to Spain's Plant Varieties Authorities. Forms for notification or authorization, [forms](#) are available in the Ministry of Agriculture, Food and Environment website. Additional information can be found in the [link](#) (Information only available in Spanish language).

Email: [oevv@magrama.es](mailto:oevv@magrama.es)

- **Imports of non-harmonized live animals including zoo and circus animals**

To import zoo animals to Spain a request using the official [form](#) (page 2) should be addressed to the Sub directorate General for Sanitary Agreements and Border Control (by email to [importacionanimal@magrama.es](mailto:importacionanimal@magrama.es)).

The requests are studied individually and potential risks are assessed. Certificate exist (see Section I above) for the most commonly traded animals. In the absence of an specific certificate, if the import of the animals is deemed appropriate, an import license is issued. Additional documentation such as an international animal health certificate could be required. More information can be found in the [link](#).

### **Responsible Authorities for Health and Veterinary Certificates:**

While the Ministry of Health and Social Services and Gender Equality (MSSSI) provides information on imports of products intended for human consumption, the Ministry of Agriculture, Food and

Environment (MAGRAMA) is responsible for live animals imports and agricultural products for purposes other than human consumption.
